HERITAGE LINE

Wabash Valley's flagship product offering—the Heritage Line of Plastisol-coated outdoor furniture will weather the elements and heavy-use environments where utmost durability is the preeminent criterion. Think of the worst weather conditions you can imagine—rain, sleet, salt spray. That's exactly what we've designed our extensive selection of Heritage Line outdoor furniture and site amenities to withstand, thanks to tough Plastisol coating.

Our broad selection of Plastisol-coated outdoor furniture and site amenities consist of ¼" Plastisol coating, heat-fused and permanently bonded to the steel—that's 30 times the thickness of paints and powder coatings. All Wabash Valley framework is coated with baked-on polyester dry powder, which provides a superior coating and appearance. Stainless-steel hardware is used on all products.

URBANSCAPE LINE

The high-end style of Wabash Valley's Urbanscape Line of powder-coated furniture fits perfectly in urban or retail environments. If rust and corrosion are a concern, Urbanscape Line has you covered with many offerings that are 100% aluminum and give you a more architectural look that's built to last.

Also within the Urbanscape Line, many collections offer recycled plastic lumber made from post-consumer plastics as a material option. This environmentally friendly material offers the look of wood, but without cracking and fading. Although the Urbanscape Line's look is high-end, it isn't high-priced. Our line can fit any budget just as well as we fit into almost any landscape. So you get a head-turning look without the eye-popping costs—just one more way the Urbanscape Line is the smarter choice.

POWDER COATING — THE DETAILS

All Urbanscape and select Heritage frameworks consist of powder coating that goes through a six-step coating system that exceeds AAMA 2604-05 (American Architectural Manufacturing Association) test specifications—one of the highest in the industry.

First, all parts are cleared to white metal with a state-of-the-art shot blast system. Then they go through a five-stage chemical pretreatment, after which they are gel-cured. Then a top coat of a super-durable polyester powder is applied before the final cure.

Our coating stands up to some of the toughest test specifications, including adhesion, abrasion resistance, chemical resistance, erosion resistance and fade resistance, to ensure that our products are long lasting.

URBANSCAPE LINE

The high-end style of Wabash Valley's Urbanscape Line of powder-coated furniture fits perfectly in urban or retail environments. If rust and corrosion are a concern, Urbanscape Line has you covered with many offerings that are 100% aluminum and give you a more architectural look that's built to last.

Also within the Urbanscape Line, many collections offer recycled plastic lumber made from post-consumer plastics as a material option. This environmentally friendly material offers the look of wood, but without cracking and fading. Although the Urbanscape Line's look is high-end, it isn't high-priced. Our line can fit any budget just as well as we fit into almost any landscape. So you get a head-turning look without the eye-popping costs—just one more way the Urbanscape Line is the smarter choice.

GREEN VALLEY | POWDER-COATED & RECYCLED PLASTIC LUMBER

The Green Valley collection offers an environmentally friendly alternative. Constructed with plastic lumber custom-extruded from recycled plastics, and powder-coated frames—Green Valley tables, chairs, benches, and receptacles are long-lasting and nearly maintenance-free. They also don't have the drawbacks of real wood, such as fading, insects, cracking and splintering.

Unlike most wood and wood-composite products that quickly fade when exposed to the weather, the recycled plastic surfaces have no wood fibers, so they retain their vibrant look for years. In addition, they don't need waterproofing, staining or any maintenance other than an occasional washing with soap and water.

FAUX-WOOD UMBRELLAS

The 9' faux-wood umbrellas (UMC532N) offer a distinctive look. Using a push-up and pin-lift mechanism, these umbrellas have a one-piece, 1 ½" diameter simulated wood pole and are made with a solid wood hub (5" height by 3 ½" diameter) with stainless steel hardware. They feature marine-grade fabric for standard tops, 8 ½" diameter flexible fiberglass ribs—which match the simulated wood grain of the pole—molded nylon joints and end tips, a single, sewn-in vent and storage ties. The simulated wood finial matches the selected pole color, which is available in teak or chestnut.

Wabash Valley can add logos to any market umbrella. Please consult a sales representative for more information.

7.5' & 9' MARKET UMBRELLAS

Wabash Valley umbrellas are some of the toughest on the market. They are a unique line of umbrellas that are made not only to endure weather conditions, but also to provide the consumer with quality, choice and longevity. What clearly distinguishes the Wabash Valley umbrellas are their nylon joints (yokes), spindle and end tips and their fiberglass support ribs. Unlike traditional metal and wood ribs, these fiberglass ribs are strong and resilient, bending and flexing to absorb wind without breaking or disfiguring. This durability, combined with an inherent resistance to rust and corrosion, results in umbrellas that last four to five times longer than traditional steel- or wood-ribbed umbrellas.
